## Description

SCORPION Cat Back System.

Want to extract a little more power from your 2015 Civic Type R FN2? A half system (cat back) is the perfect compromise, leaving the factory catalysts (where fitted) in place and bolting directly to the OEM system. Most of our half-systems delete the centre cat or silencer, for improved gasflow and sound, but leave the car fully road legal and MOT ready. This system has been constructed utilising state-of-the-art manufacturing processes and advanced materials to give a dramatic reduction in weight over O.E. This exhaust has been power optimised for your vehicle to give optimal model specific performance increases across the entire usable rev range.

The system is a 63.5mm (2.5?) resonated cat back with quad 100mm polished tips or on additional costs with Black tips (**see drop down menu**).
