## Description

DS3000 is the FERODO RACING compound that has set the braking standard from 1998. It has contributed to countless wins and podium positions in many Touring car, rally & GT championships around the world.

The Ferodo DS3000 pads feature:

- Developed for race applications
- Perfect performance on light and heavy vehicles
- Heavy duty all-round material choice
- Short bedding time
- Multiple applications including touring car, rally, Group N, single seat, hill-climb
- Average friction coefficient 0.48 over working temperature range of 200°-650°C

Please note: When used on smaller vehicles the pressure on the brake pedal has to be reduced, otherwise the pads will 'over brake' and reach to high temperatures.

The DS300 pads are not made for road use but this will not cause any extreme problems.

### Price is per set

Applicable to:

- Civic 2015+ FK2 Type R Turbo
