Js Racing C304 Stainless 60RS Exhaust System (Single)

Description

This is the product listing for the Js Racing C304 Stainless 60RS Exhaust System (Single) manufactured by Js Racing. Part Number C304-S1-60RS.

The very popular J's Racing titanium exhaust went through a model change and the new version has made a debut to the market. By maintaining the straight structure designed for the minimum back pressure, the new version boasts a higher quality with a larger silencer. Made by a 1mm titanium pipe, the weight is reduced to the limit. Compared with the stock exhaust, the new titanium exhaust achieved an incredible weight reduction of more than 50 %. The main pipe is curved exquisitely by a three dimensional bending machine for the ultimate smoothness and the minimum air resistance. Furthermore, the distinct shape of the "dolphin tail" will catch everyone's eyes.

The 60RS is designed for the street driving with 60mm main pipe diameter. The silencer is a part of the straight structure and the exhaust produces impressive torque and power in all rev ranges.

The driver can enjoy the distinguishing full titanium sound from the VTEC engine. When the inner silencer (sold separately) is used, the exhaust meets the Japanese safety standard. regarding the noise level.
